Cloudy	Heavy Rain	Heavy Rain	Heavy Rain	Partly cloudy (night)	Heavy rain showers (night)
Precipitation probability					
10%	30%	70%	70%	20%	40%

Forecast for Sunday 31 Oct 2021

Weather: Cloud thickening by dawn as an area of rain spreads northeast during the morning reaching the Perthshire hills by mid-morning. Precipitation may fall as sleet at first on the Southern Cairngorms but will readily turn to rain during the afternoon. Rain will clear from the west by mid-afternoon and becoming brighter again for a time around Loch Tay during the afternoon. Some heavy showers are possible during the late afternoon and evening.

Chance of cloud free mountain/hill tops above 800m: 80% early on Sunday morning but soon reducing to 40% associated with the area of rain. Improving later in the afternoon back to 80% but reducing again in showers.

Visibility: A fine start to the day with good views likely especially for the Glenshee and Angus Glen hills, visibility will reduce as cloud and rain spread from the south and by mid-morning visibility will reduce to just a few kilometres in rain and sleet. Cloud bases will fall during the morning and become broken above 400m, perhaps low cloud will be more scattered for the Perthshire hills around Glen Lyon and Loch Tay where there is some shelter. Cloud will lift and break as rain clears in the afternoon, although cloud is likely to linger around the Southern Cairngorms remaining scattered above 600m. Cloud will thicken and lower in any showers during the afternoon and evening period.

**Level above which ground is expected to be frozen/snow is expected to settle.*

Met Office Aberdeen Meteorologist's View

Although conditions will be reasonable in the morning, it will turn quite unpleasant in the hills with gales on the summits and heavy rain and poor visibility for a time during the day, some localised flooding is expected around the Angus Glens and perhaps Deeside. There will be a significant wind chill through the day. Winds will ease later in the day.

Forecast for Monday 01 Nov 2021

Weather: Clear spells overnight although a few showers are possible. Strengthening northwesterly winds will push showers into western ranges during the morning. Showers may turn wintery over the munro tops and could be heavy for a time.

Maximum wind: Westerly 10-15mph increasing northwesterly 20-30mph. Some stronger gusts likely in the afternoon.

Chance of cloud free mountain/hill tops above 800m: 60%, low cloud in the morning will lift a little for a time but periods of showery rain will bring cloud back below summits at times during the day.

Visibility: Scattered or broken low cloud above 600m will lift a little during the morning but as periods of showery rain approach cloud will thicken and lower over the hills perhaps to 500m temporarily. In sleety showers visibility will become quite poor for a time. Low cloud will tend to thin and clear later in the day.

Temperature: **Glens:** Plus 4 Celsius rising to 7 Celsius.
At 800m: Plus 3 Celsius falling to 1 Celsius.
Freezing level: 1300m falling to 1000m
